EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claims 9-13 have been canceled. This application is in condition for allowance except for the presence of claims 9-13 directed to a non-elected invention without traverse. Accordingly, the claims have been cancelled.

The following is an examiner's statement of reasons for allowance: The subject matter of the independent claim could either not be found or was not suggested in the prior art. The subject matter not found was the method of measuring alternans by arranging twelve amplitude measurements into eigenvariables by rank ordering of mean square amplitudes contained in each of the eigenvariables and separating the spectral energy in the eigenvariables due to alternans from that due to respiration, in combination with the other steps in the claims.

The closest prior art of Nearing shows a method and system to quantify alternans using ECG data and filtering to remove the respiration signals, but not arranging twelve amplitude measurements into eigenvariables by rank ordering of mean square amplitudes and separating respiration from the alternans by determining the eigenvariable with the greatest amount of respiratory energy.

Art Unit: 3762

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George R. Evanisko whose telephone number is 571 272 4945. The examiner can normally be reached on M-F 6:30-5:00.
